

ARTYOM OBSHATKO

Warsaw, Poland

+48 797 235 949 | obshatko.artem@gmail.com | [LinkedIn](#) | [Github](#)

Professional Summary

Software Engineer with 10+ years of experience in mission-critical and distributed systems, combining deep background in industrial automation with strong focus on C/C++, Linux, and system-level software development. Experienced in debugging, reliability engineering, and secure coding, with proven ability to support high-availability systems and collaborate across global teams.

Technical Skills

Programming: C, C++, Python, Bash

Systems: Linux (Ubuntu, CentOS), POSIX APIs, debugging, concurrency fundamentals

Networking: TCP/IP, Ethernet, client-server architectures

Tools: Git, Make/CMake, GDB, Valgrind, VS Code

Domain: Distributed systems, fault management, industrial control systems

Professional Experience

Software Engineering Student (Systems Programming)

42 Warsaw | *Dec 2024 – Jan 2026*

- Intensive peer-to-peer program focused on C/C++ programming, Linux internals, and system-level development.
- Implemented projects covering memory management, multithreading, file systems, and networking basics.
- Emphasis on clean code, testing, debugging, and collaborative development.

Industrial Automation & Control Systems Experience (Summary)

Honeywell / Lukoil / Tengizchevroil / Industrial Plants | 2011 – 2024

- 12+ years designing, integrating, and maintaining large-scale SCADA, DCS, and PLC systems.
- Led commissioning, troubleshooting, and zero-downtime migrations in high-risk production environments.
- Developed custom control logic, HMI solutions, and automation scripts.
- Performed system acceptance testing, fault analysis, and reliability improvements.
- Managed cross-functional teams and ensured compliance with safety and technical standards.

Maintenance Supervisor & Reliability Engineer – OJSC Tashkent Plant | 2007 – 2010

- Managed 70-person team; optimized preventive maintenance, reducing downtime.
- Enhanced reliability of complex industrial systems through process improvements.

Key Projects

- On-Process DCS Migration – Saudi Aramco: Secure, zero-downtime upgrade of a live production system.
 - Industrial Automation Upgrade – SABIC / ExxonMobil: System validation, logic testing, production readiness.
 - Water Processing Automation – Uzbekistan: Full lifecycle delivery from design to stable handover.
-

Education & Certifications

B.Sc. Mechanical Engineering

Tashkent State Agrarian University | 2002 – 2007

Certifications

- Functional Safety Engineer – TÜV Rheinland
 - Cisco CCNA Routing & Switching
-
